

CSCI-101 Programming I

Quiz 2

Name

Key

1. Write a complete program in a class named Quiz2 that

- Asks the user to enter 2 integers,
- Reads the integers from the keyboard,
- Computes the sum of the two integers read from the keyboard,
- Prints "Sum over 10" if the sum of the two integers is greater than 10, otherwise prints "Sum not over 10".

```
import java.util.Scanner;
```

```
class Quiz2 {
```

```
    public static void main (String[] args) {
```

```
        Scanner kb = new Scanner (System.in);
```

```
        int value1 = kb.nextInt();
```

```
        int value2 = kb.nextInt();
```

```
        int sum = value1 + value2;
```

```
        if (sum > 10) {
```

```
            System.out.println("Sum over 10");
```

```
        } else {
```

```
            System.out.println("Sum not over 10");
```

```
        }
```

```
    }
```

```
}
```
