

CSCI-232 Client-side Development - Assignment 3

Guess the Person

Points		Points Awarded
20	The view component loads a single component that renders a 7x7 CSS grid and fills 90% of the viewport height and 100% of the viewport width.	
5	The view component displays 2 buttons; one labeled "Scramble" and one labeled "Identify"	
20	The grid component is partitioned into exactly 7 segments, all of which have unique dimensions.	
15	Each segment contains a named slot.	
10	The view component randomly places 7 images (or segments of an image) into the 7 slots using dynamic slot names.	
20	When the user presses the button labelled "Identify" the 7 images in the slots are rearranged into the slots such that the grid component displays an impression of a famous person.	
10	When the user presses the button labelled "Scramble" the images are randomly placed into the 7 slots.	
Deductions		
-100	The instructor has not been provided with URL for live site.	
-10	The app is NOT deployed to same URL as previous assignment.	
-100	The app's source code is NOT deployed to Github repository OR instructor does NOT have access to repo OR instructor has NOT received an email with the source code repo URL.	
-20	The student does NOT demonstrate their app during class	
-100	The student's source code contains code that is identical to the source code provided by another student in the class.
